purview of philosophers in particular social and political philosophers further to obtain an insider's view on practice and possibilities the volume includes essays from a handful of thoughtful business leaders research should consider not just how to make sustainability profitable but also how to make profitability and the modern economic system sustainable if we are to better comprehend why the world is in protest to reflect on progress or dilemmas of trust we must appreciate the tenuous assumptions of modern microeconomics and markets and hear from modern philosophers about the basis and limits of rationality

evidence for some individuals having multiple career anchors was found complementary and exclusivity career anchor relationships are identified and a model for representing them is presented the importance and possible benefit of understanding both an individual's preferred and unpreferred anchors is discussed the non reflexive nature of career anchors is explored and the idea of mutually exclusive career anchors is rejected weaknesses in the octagon shaped career anchor relationships diagram presented by feldman and bolino are discussed

more than twenty years after edgar h schein introduced career anchor theory 1974 daniel feldman and mark bolino 1996 critiqued both the theory and methods schein used to describe career anchors they propose that understanding the underlying factor structure of the career orientations inventory coi will give insight into the relationships between multiple career anchors these relationships describe which career anchors are complementary i.e. having congruous characteristics or mutually inconsistent i.e. having oppositional characteristics and enable a study of the degree to which those relationships have an impact upon career outcomes this study examined how well each of four models of career anchor relationships found in the career anchor literature describe mutually inconsistent career anchor pairs suggested by feldman and bolino were not found to have stronger negative correlations with one another than those proposed by the other three models also the mutually inconsistent pairs proposed by feldman and bolino were not found to have on the whole a better fit from confirmatory factor analysis than those

proposed by the other three models instead schein s proposed model of mutual inconsistency was the best fit albeit a weak fit weaknesses were also found in the two dimensional octagonal models proposed by feldman and bolino by chapman and by bristow the data do not support a two dimensional model an additional finding was that the relationship between the anchors actually fits an orthogonal model better then either the complementary or mutually inconsistent representations proposed by each of the four models continued research opportunities are available for those interested in studying career anchor theory
